

Mayank Sagar

Full Stack Developer | MERN Stack · Next.js · Real-Time Apps (Socket.io)

Email: mayankrsagar@gmail.com · Phone: +91 83902 26312 · Mumbai, Maharashtra

[LinkedIn] · [GitHub]

Profile

Detail-oriented Full Stack Developer focused on MERN and Next.js with hands-on experience building scalable, production-grade web apps and real-time systems using Socket.io. Skilled in end-to-end product delivery: architecture, API design, secure authentication, optimized file handling, CI/CD, and performance tuning. Strong collaborator who writes maintainable code, builds developer-friendly docs, and mentors peers and students.

Core Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL, Python

Frontend: React.js, Next.js, Redux, Tailwind CSS, Material UI, Vite

Backend: Node.js, Express.js, RESTful APIs, Socket.io, Multer

Database & Cloud: MongoDB, PostgreSQL (familiar), Cloudinary, basic AWS/DigitalOcean concepts

Tools & Practices: Git, Postman, CI/CD, Razorpay integration, unit testing, agile workflows

Professional Experience

Full Stack Developer | SmartBridge Educational Services Pvt. Ltd. · Sept 2025 – Present

- Built and maintained core features of the company's e-learning platform using MERN + Next.js.
- Designed and deployed robust backend APIs and reusable React components; improved page load time and reliability.
- Led functional testing and triaged regressions to keep product stability high.
- Produced technical walkthroughs and training materials for clients and internal teams.

Software Development Intern | Neuradigi Technologies (OPC) Pvt. Ltd. · Mar 2025 – Aug 2025

- Implemented Razorpay checkout flow, raising payment completion rates.
- Built a React dashboard integrating Web3 event listeners with Express backend.
- Automated CI/CD pipeline tasks to speed deployments.

Crio Full-Stack Engineering Fellowship · Feb 2024 – May 2025

- Delivered 8+ industry-style MERN projects; implemented authentication services, CRUD APIs, and dynamic dashboards.
- Practiced code reviews, version control workflows, and sprint-based delivery.

Selected Projects

Discord Clone — Real-time chat with Socket.io; secure media upload (Multer + Cloudinary); HTTP-only cookie auth; optimized frontend performance with Vite and Tailwind.

Military Asset Management System (MAMS) — Role-based asset tracking, RS256 JWT auth, RBAC middleware, audit logs.

Restoration Hub — Full-stack listing & booking platform with secure auth, image uploads, and CI/CD deployment flows.

Education

Bachelor of Science in Information Technology — Mumbai University, Dec 2020.

Certifications & Achievements

Crio Certified Software Developer (Mar 2025) · (Optional) MongoDB Developer Associate · Solved 200+ algorithm problems (LeetCode focus). Active open-source contributor; mentored students.
